

Objectives are discovered in action as we discover (what was not conceived, in planning)

- a) consequences, (including linkages)
- b) in <sup>specific</sup> context, and
- c) alternatives; possibilities for manipulation, dissemination; and linkages

It's a process

S: 1. Should be be used in connection with immediate events? (except to monitor US investment & initiation)

(hypotheses)

2. Should be be measured for explanation of long-run developments?

2. ~~The~~ Committee on least interventions.

3. ~~Least~~ Interventions focused on development in SVN. Necessary

to discuss DRV role — prevent US vision of extent and critical nature of that role, and need to stop it (a major goal of US, along with GVN).

1. What could we see for that would really happen DRV

support, + would be desirable? 2) Prevention & supply

maintain force + DRV, at key points?

How about US regarding military action?

(Would this force them off roads?) S: 1?

(On point now at night?)
